Docket No. 295295US0XPCT Application Serial No. 10/590,810

Preliminary Amendment and Response to Notification to Comply dated May 3, 2007

ABSTRACT

A thermostable mutant DNA polymerase; a method for obtaining the thermostable mutant DNA polymerase by identifying a thermostable mutant polypeptide exhibiting enzymatic activity, wherein the thermostable mutant polypeptide is a variant of DNA polymerase I obtained from *Thermus aquaticus*; a polynucleotide, an expression vector, and a host cell encoding the thermostable mutant DNA polymerase; and a method of performing a reverse transcription polymerase chain reaction (RT-PCR) utilizing the thermostable mutant DNA polymerase, as well as a kit for facilitating the same.
